Re: Information Request, Underground Injection Control (UIC) Program

Dear Sir:

On June 18, 2015, the Environmental Protection Agency's (EPA) UIC Program conducted a compliance inspection of your facility. During the inspection it was not possible to determine the discharge point of the circular floor drain in the garage, with the information provided. In order to complete our compliance evaluation, we request that you determine and document to us the point of discharge of the garage floor drain. Possible discharge points include the municipal sewer, a storm drain, a septic system, a drain field, a dry well, a French drain, etc.

Please submit the requested information within thirty (30) days of receipt of this letter to Andre Hoyer of my staff. Include our mail code, 3WP22, in the address. Failure to provide the requested information or providing misleading or false information may subject you to civil and criminal sanctions. The information you provide may be used by EPA in administrative, civil or criminal proceedings. We therefore urge your serious attention to this matter.

40 C.F.R §144.27 of the UIC regulations authorizes EPA to request such information in order to determine if a subsurface discharge may be endangering an underground source of drinking water. If you have any questions concerning this matter or the UIC program, please contact Andre Hoyer at (215) 814-5461. Please use the enclosed return address label for your reply.

Sincerely,

A handwritten signature in cursive script that reads "Roger Reinhart".
